

LAU KIN WANG

Tsinghua University, Undergraduate
School of Vehicle and Mobility

Email: liujianh23@mails.tsinghua.edu.cn

Phone: +86 15907565442

EDUCATION

Tsinghua University, Vehicle Engineering (Body Design)

2023 - PRESENT

GPA: 3.8/4.0 Exchange program to NTU for 1 semester

PROJECTS

Gesture2Prop: Conditional VR Prop Generation from Hand Gestures and Speech (UIST 2025 Demos)

- **Participated in Unity development**, conducting research on human-computer interaction based on VR gestures, voice, and AI combined with Quest 3.

Glazestopia: A User-Adaptive VR System for Experiencing Chinese Royal Glaze Craftsmanship (IEEEICME2026 Submission)

- **Responsible for UE system development**, researching the impact of VR systems on users' learning, understanding, and participation in the royal glassmaking process, including system usability, learning effectiveness, and impact on user interaction methods, and responsible for system development.

AI-Powered Writing Assistant Leveraging Advanced Brainstorming Techniques

- **Participated in web development**, a research of an AI-driven writing assistant designed to innovatively integrate user intention and knowledge, enabling deep interactions with AI agents to generate highly personalized and creative content.

VR Game Development "CorcalCoro"

- Led the development of Coral Coro, a **VR gesture-based music game for Apple Vision Pro and Meta Quest**, developed and optimized **XR interactions**, and **integrated gesture and voice recognition** for an immersive user experience.

SKILL

- **Langchain AI Agent**: Basic understanding of intelligent agent development frameworks, and can use Langchain to access the APIs of common models and develop simple intelligent agents.
- **Game and Prototype Development (Unity, Unreal Engine)**: Well-versed in core game development principles, capable of implementing immersive environments, scene rendering, VR prototypes, and games.
- **ROS System, Machine Learning, YOLOv5 Computer Vision**: Proficient in developing autonomous vehicles with advanced expertise in machine learning and computer vision, leveraging YOLOv5 for high-performance detection.
- **Arduino Embedded Programming**: Experienced in programming robots using Arduino for various applications.
- **3D Modeling (Blender, Cinema 4D, SolidWorks)**: Skilled in creating intricate 3D models and animations for diverse projects, including complex mechanical designs.
- **Web Interaction Development**: Proficient in building and publishing interactive webpages using HTML, CSS, JavaScript, and React.
- **Programming (Python, C++, C#)**: Highly skilled in software development, with expertise in web scraping, data processing, and leveraging multiple programming languages for efficient solutions.

AWARDS

2025 Comprehensive Excellence Scholarship

2025

Science and Technology Innovation Outstanding Scholarship

2025

3rd Prize, Tsinghua University Toyota Future Car Challenge

2025

2nd Prize, Tsinghua University Future Disaster Control Innovation Competition

2025

Special Prize, The 8th Topzhu Cup Tsinghua University Software Design Competition

2025
